AI Response Validation Report

AI Hallucination Detection System — v2.0
Generated: 13 October 2026 at 12:18 PM

User Query

What is the capital of France, and what is its population?

Overall Validation Result

Overall Quality Verdict	**Fail**
Weighted Overall Score	30/100
Relevance Score	75/100 (Partially Relevant)
Accuracy Score	0/100 (Contradictory)
Hallucination Risk	100% (Severe Hallucination)
Completeness Score	75/100 (Substantially Complete)
Supported / Unsupported Claims	0 Supported / 0 Unsupported
Contradictory / Uncertain Claims	1 Contradictory / 0 Uncertain
Processing Time	0 ms

Consolidated Evaluation Reasoning

Overall evaluation verdict is 'Fail' with a weighted reliability score of 30/100. Dimension Scores — Relevance: 75/100 (Partially Relevant), Accuracy: 0/100 (Contradictory), Hallucination Risk: 100% (Severe Hallucination), Completeness: 75/100 (Substantially Complete). Major issues identified: CRITICAL: Severe hallucination or unsupported claims detected.; CRITICAL: 1 claim(s) directly contradict trusted reference context.; ACCURACY: High proportion of inaccurate or unverified statements (0/100).

Completeness Assessment (M3.1)

Status: Substantially Complete (75/100)

Reasoning: The response addresses the core question and most key requirements (1/2 fully covered). However, minor details or sub-questions regarding 'what is its population' were omitted.

Addressed Aspects:

✓ What is the capital of France

Claim-Level Analysis

Claim #1	POTENTIAL HALLUCINATION	67% confidence

The capital of France is Paris, and its population is 50 million people.

Evidence:

> "Paris is the capital of France."

Reasoning:

> The reference context appears to contradict this claim (confidence 67%). Negation signals and topic mismatch were detected between the claim and the reference. This claim is a potential hallucination — the AI may have generated an incorrect or misleading statement.
